Career Objective

MCA student with foundational knowledge in Python and Artificial Intelligence, seeking an entry-level opportunity through Superset to build strong software engineering skills and grow within enterprise systems.

Education

Master of Computer Applications (MCA) – Distance Learning
Chandigarh university | 2025 – Present

Bachelor of Computer Applications (BCA)
Chandigarh University | 2022-2025 | CGPA: 7.01

Technical Skills

Programming: Python, OOP, Basic Data Structures & Algorithms

Databases: MySQL, MongoDB (Basic)

Tools and Technologies: Git, GitHub, VS Code

Web Basics: HTML, CSS, JavaScript (Basic)

Software Engineering Fundamentals: Software Development Life Cycle (SDLC)

Training & Academic Projects

AI Summer Training – Fraud Detection System
Intel Corporation (in collaboration with Chandigarh University)

- Completed a 6-week AI summer training program focused on machine learning fundamentals using Python.
- Developed a basic fraud detection model using scikit-learn, supervised learning as part of the training curriculum.

Tic-Tac-Toe AI Game (Final Year Project)

- Designed and implemented a Tic-Tac-Toe game with rule-based AI logic using Python.
- Applied decision-making logic to simulate computer moves.
- Strengthened problem-solving and algorithmic thinking skills.

Professional Experience

AI Project Associate (Speech & Language Data) | OLA Krutrim | Mar 2025 – July 2025

- Worked on speech-to-text and language datasets supporting AI model training and evaluation.
- Performed transcription validation, quality checks, and error analysis on audio-text data.
- Gained exposure to real-world AI data pipelines and quality assurance workflows.

Certifications

- AI Summer Training – Fraud Detection using Python (Intel & Chandigarh University) [Certificate](#)
- Python Programming – Coursera Certificate : [Part 1](#) [Part 2](#)

Languages

English – Professional Working Proficiency | **Hindi** – Native Proficiency
